

ADVANCE CARE *IP*

Silicone Pager Boot

The Advance Care Silicone Pager Boot has been designed to provide increased impact protection.

The Boot protects the Advance Care Alphanumeric Pager from scratches, bumps and dust, while the ergonomically designed casing offers superior grip and comfort.

A powerful swivel clip hook securely attaches the Pager Boot to your belt - ensuring the Pager is held firmly in place.

The swivel accessory creates 360° viewing, allowing for ease of use in any situation.

Advance Care's Silicone Pager Boot is lightweight and durable and the non-stick flexible silicone also makes this second skin easy to put on and remove.

The silicone case does not restrict use, with buttons easily accessible.

Pager alerts and vibrations are still heard and felt as if the Boot was not there, unlike other protective cases which can muffle or distort the sound.

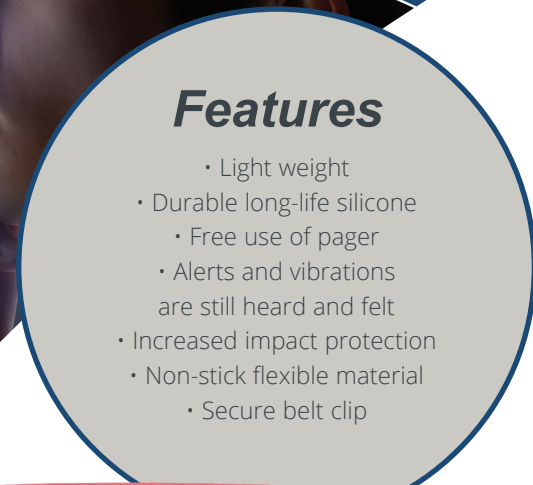

The side loop on the Pager Boot allows for bungee cords and lanyards to be used simultaneously.

The neutral grey colour is not only aesthetically pleasing, but designed to blend with existing equipment for visual stability.

Pager Lanyard

For ease of access, the Pager Lanyard clips securely to the Pager, allowing it to be worn around the neck.

For the ultimate in safety, the Pager Lanyard features a 'snap point' release. When undue stress is placed on the Lanyard it immediately releases, protecting staff from neck or other injuries.

Features

- Light weight
- Durable long-life silicone
- Free use of pager
- Alerts and vibrations are still heard and felt
- Increased impact protection
- Non-stick flexible material
- Secure belt clip
